Prairie Village Pool Healthy Swimming Habits

Many people do not realize that swimming is a form of communal bathing and that pool and spa water contains microorganisms. It is not sterile even when treated with disinfectants like chlorine. Many don't realize that everybody releases traces of feces and millions of bacteria into the water, even after taking a shower. To mitigate the chances of pool contamination, we ask for your help with the following if you intend to use the Prairie Village Pool:

- Don't swim if you have diarrhea
- Don't swallow pool or spa water
- Don't swim unless you shower, and wash your hands after using the bathroom
- Take your kids on frequent bathroom breaks
- Change diapers frequently in the bathroom, not poolside
- Wash children thoroughly with soap and water before swimming
