

Comprehensive Parks and Trails Plan

The plan on the following page highlights the community-wide improvements recommended for the parks and recreation facilities in Prairie Village, as well as proposed corridors for the development of a trail system. This plan includes only the most significant improvements relative to each park. Other detailed improvements are recommended beyond those listed and can be reviewed with the individual park plans included in Section 7 of this report. Additional information on the trail system can be found in Section 6.

It should be noted that this plan is a long-range plan subject to future priority setting and annual review of viability by the Parks and Recreation Committee as well as the City Council.
